

Anu Benoy

Saint John, NB | Phone: +1 (226) 899-6962 | anubenoyarackal912@gmail.com | <https://www.linkedin.com/in/anu-benoy/>

1+ years experienced Data Analyst with a strong background in using various tools to extract data from web as well as training and deploying ML models in cloud environments. Proficient in utilizing a variety of tools and frameworks to extract insights from data and drive business value.

SKILLS

Technical skills :

- Worked on various data extraction tools that uses XPATH to extract and monitor data as well as developed automated scripts to do different pruning jobs for automation.
- Experience in using PyTorch and TensorFlow to Pre-Processing, training, and deployment of face detection models as well as used docker to deploy ML modes and versioned it using Git versioning system.
- Designed, implemented and deployed application programs proficiently in Swift, SwiftUI, Python3, JavaScript, Java, C#, PHP, VB, HTML, and CSS, showcasing versatile coding expertise and problem solving.
- Managed backend operations utilizing AWS, Azure, Google Cloud, MySQL, DynamoDB, and Firebase, optimizing data retrieval speed, ensuring security, and implementing efficient backup systems.
- Backed up, merged, meticulously revised, and expertly resolved code conflicts on Bitbucket, GitHub, and GitHub Enterprises, ensuring a robust and seamlessly integrated codebase.

Soft skills :

- Led project teams using Agile Methodologies with strategic planning and execution using Confluence, Jira, and Azure DevOps, showcasing strong organizational and conversational skills for timely project success.
- Analyzed complex datasets and designed effective solutions for data science problems also making the faster retrieval time for huge data extractions.
- Mentored, collaborated, and implemented innovative ideas that have been presented and developed successfully to enhance project outcomes.
- Facilitated knowledge transfer to colleagues, significantly boosting overall productivity and elevating the work environment's quality.

EXPERIENCE & CONTRACT

Data Operations Analyst

@ Gartner

2021 - 2022

Researched, designed and development different Automated scripts to prune and parse necessary data from the web and also made data visualization to get better grasp of data.

- Leveraged technical skills in utilizing X-Path, JavaScript (Js), Python, and C# for effective and accurate data extraction from various sources.
- Utilized Tortoise Git for efficient version control and collaborative code management and Grafana to monitor and analyze the data extraction process, optimizing performance and identifying areas for improvement.
- Collaborated on the testing and enhancement of an in-house tool, contributing to its functionality, reliability, and overall effectiveness.
- Played a key role in the successful migration of data from legacy systems to a new tool, ensuring data integrity and a seamless transition.

FoodARoma - Built your Own Pizza

June 2023 - Present

- Enabled users to create and customize personalized pizzas, visualizing the end product in real-time, while integrating order/pickup functionalities for enhanced customer experience using Core Animation.
- Implemented a location-based system using CoreLocation for restaurants to track customer arrivals, and integrated a 3D model feature allowing establishments to showcase special menu items through AR views.

Penny - Expense Tracking App for iPhone

May 2022 - Sept 2022

- Developed and maintained Penny, a privacy-focused, ad-free iPhone expense tracking app with multi-account management, graphical spending analysis using Charts, and customizable categories, showcasing expertise in iOS app development, UI/UX design, and security implementation.

Nearest Grocery Mart (NGMart)

2020 - 2021

- A responsive web platform integrating the shops in small towns enabling sellers to take part in e-commerce and gives buyers an idea about the availability of required items as well as monitoring and keeping track of all the inventories and there expires that automatically informs owner and give them a report detailed report based on there inventory.

EDUCATION & CERTIFICATIONS

• Postgraduate diploma in Mobile Solutions Development *May 2022 - Aug 2023*

Graduate with Distinction (GPA: 3.6/4.0) skilled in mobile app design, native/cross-platform development, and machine learning. Demonstrated innovation through real-time video data model predictions in iOS.

• Masters Of Computer Application (MCA) *Aug 2016 - Aug 2021*

MCA graduate with Distinction excelling in cybersecurity research (Metasploit, Vail) and practical web/mobile development expertise.

• Computing & Communication System for Fourth Industrial Revolution *Dec 2020*

Demonstrating proficiency in advanced technologies and systems essential for navigating the complexities of the modern digital era.

• Introduction to Data Analytics *Nov 2020*

Gaining foundational knowledge and practical skills in extracting insights from data to drive informed decision-making and business strategies.

• Analyzing and Visualizing Data with Microsoft Power BI *Sep 2020*

Demonstrating proficiency in harnessing the capabilities of Power BI to analyze datasets, create insightful visualizations, and derive actionable insights for informed decision-making.

• Introduction to PostgreSQL *Sep 2020*

Acquiring fundamental knowledge and practical skills in database management, SQL querying, and data manipulation using PostgreSQL, a powerful open-source relational database management system.

• Advanced Python Programming Bootcamp *61 hours July 2020*

Certifies ability to develop implement complex algorithms, and design high-performance applications with a deep understanding of Python's advanced features and capabilities.

• IOT Internship *March 2018*

Gaining hands-on experience in developing and implementing IoT solutions, integrating sensors and devices, and analyzing data streams to optimize system performance and functionality.
